

Disaster? Relief.

Devastating natural disasters damage both personal lives and professional assets.

As your business partner, First American Residential Value View recognizes the absolute importance of having accurate information following a disaster. To assist you in obtaining information on your portfolio properties that may be damaged, we offer the Damage Assessment Report.

- ▶ The Damage Assessment Report is an exterior inspection report completed by a Real Estate Professional that delivers a concise **property condition report**, noting visible damage, repair estimate, and a determination of whether or not the property is habitable.
- ▶ The Damage Assessment Report provides you with an accurate assessment of the **condition of the neighborhood**, indicating the availability of utilities, damage to roadways and neighboring homes, the status of schools and businesses in the area, and the current evacuation status.
- ▶ Adding a **current photograph** removes the guesswork about the condition of the property.

Quickly and reliably, Value View delivers a comprehensive report containing information on the property and the neighborhood, and a current property photo—delivered electronically in just three days.

When you need quick and accurate property damage information, you can rely on Value View to deliver.
